

Y1 Geography: Seasons and Weather: Local Land Use

Prior learning that will help me

- I understand some important processes and changes in the natural world around me, including the seasons.
- I can name and explain the differences between the 4 seasons of the year, linked to my science learning.

The Arctic and Antarctic are the furthest away from the **equator** and the sun, meaning that they are the coldest places on Earth.

Weather describes what it is like outside throughout the day in a place eg today is sunny and warm.

Climate is looking at weather patterns in a place over a long time (30 years). It tells us what the weather is likely to be at different times of the year.

Key Vocabulary

weather, climate, globe, map, rainfall, seasons, hot, cold, temperate, Equator, Arctic, Antarctic, land, coastal, farms, farming, Lincolnshire, features

There are 4 **seasons** each year in the UK

The land in Lincolnshire is very suitable for arable farming because of its temperate climate and healthy soil.
