

Y2 Science: Plants

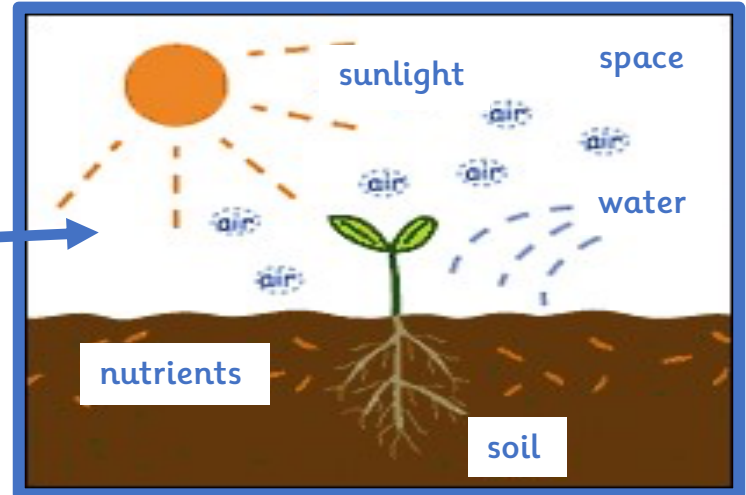

What I remember from Y1:

- Names of plants in our local area
- Plant parts
- Evergreen and deciduous

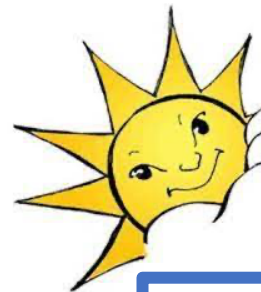

Plants may grow from either **seeds** or **bulbs**.

What plants need to grow and be **healthy**:

seeds

Seeds and **bulbs** need to be planted outside at the right times of year to grow.

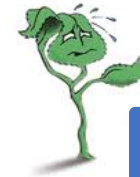

Some plants are better suited to growing in full **sunlight**, and some grow better in partial or full **shade**.

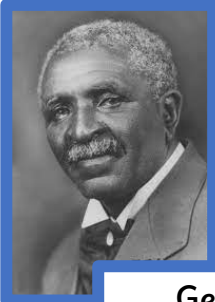

bulbs

warm

cool

George Washington-Carver
1864-1943
- invented crop rotation to protect soil.

seedlings

mature

Mature plants may have flowers, which then develop into seeds, berries and fruits.
