

Y5 Science: Animals, including Humans

What I remember:

- Healthy nutrition (Y3)
- Humans have offspring that look like them (Y2)
- Basic conditions needed to survive and grow
- Hygiene (Y2)

baby

child

adult

elderly

adolescent

When babies are young, they grow rapidly. They are very **dependent** on their parents. As they **develop**, they learn many skills.

At **puberty**, a child's body changes and develops which enables the adult to **reproduce**.

At old age, the body begins to work less **effectively**, but being healthy in youth can limit these **changes**.
